

**Amendments to the Specification:**

Please add the following paragraph to page 5 to be the first paragraph:

It is also in the scope of the present invention that any calculations about the direction to the site, and any positioning of the phone are to be performed according to the sun or the moon.

Please add the following paragraph to page 9 as the last paragraph:

Figure 19, schematically presenting the displayed information according to one embodiment of the present invention.

Please add the following paragraph to page 20 as the last paragraph:

Reference is made now to figure 19, schematically shows the displayed data after the direction to the geographical site has been calculated. In this embodiment the geographical site is Mecca, and the calculations are made according to the position of the moon, in order to facilitate the user to find the direction to Mecca, without finding the north. The arrow is the indicating means, showing the user that the direction to Mecca is about 90 degrees to the right. In this embodiment, the cellular phone is positioned towards the moon, and then the user is shown where to direct in order to head to Mecca.

Please add the attached ABSTRACT OF THE DISCLOSURE to the application.
